

Introduction:

Shah Abdul Latif Bhitai Welfare Society (SALBWS) a national, public interest, non-governmental which is a tax exempted organization works in the rural and urban areas of Sindh since 1999 and is registered as an autonomous not for-profit organization Provincial level organization with Department of Social Welfare, Government of Sindh since 2001 under Registration and Control Ordinance 1961 (XL VI of 1961) vide registration No: 1833-DSW.

SALBWS has an overall mission to facilitate the establishment and improvement of sustainable livelihoods of the rural poor in all the provinces of Pakistan especially in Sindh. This is accomplished through the mobilization of poor communities to help them plan and implement their own development agenda.

The informal conception of SALBWS took place more than 4 years ahead of its formal registration as a civil society organization and since then it has been zealously working and implementing different welfare projects to achieve its objectives. During this period, it has gained confidence and cooperation of many social organizations, donor agencies and philanthropists to implement its projects in the health, education and social welfare sectors. In spite of facing financial constraints and social challenges since its establishment, SALBWS has been able to implement, run and complete many welfare projects in Sindh, especially in rural areas, for the betterment of poor and needy people and has so far benefitted more than 10 million population (1.5 million poorest of the poor households) living in 16,940 villages in 18 District Province of Sindh.

SALBWS has 15 focal persons in districts where it works, who continue to facilitate women of their area to transmit product and distribute income as major number of villages do not have post offices.

SALBWS has a team of skilled craft women / men who provide guide line and intensive training to women and trains and promote women through revival of traditional skills. This is being done through various stages such as:

1. Capacity building & training.
2. Advocacy, mobilization & awareness rising.
3. Strengthening networks & linkages.

Project

The Women Development Department of the Government of Sindh has initiated a Project for Training of 150 unmarried females and mothers in running Baby Child Care Centers in selected districts of Sindh. The project is being implemented by Shah Abdul Latif Bhitai Welfare Society (SALWS) which has offices in 15 districts of Sindh.

Project Goal

The project envisages that after training of females in running Baby Child Care Training Center, they would be able to set up and run a sustainable enterprise mainly a Baby Child Care Training Centre in under-privileged areas to add on and support in the development of the local communities, by providing opportunities to individuals (especially females), for poverty alleviation and progression into a developed society.

Progress

The Shah Abdul Latif Bhattai Welfare Society, in partnership with Ministry of Women Development, Govt, of Sindh, has commenced the pilot project, “Baby Child Care Training Center”. This project is being implemented by SALBWS with effect 22 May 2012 to train the required human resource (women and girls) for the better development of children of families which have working mothers by establishing Child and Baby Care Centers in the target areas. Through this project the local mothers would be able to gain collective knowledge for the care and development of their children.

This project will be implemented in different selected districts of Sindh which include Jacobabad, Kashmore-Kandhkot, Kamber-Shahdadkot, Ghotki, Umerkot, Tharparkar and some Towns of District Karachi i.e. Landhi, Malir, Bin Qasim, Gadap, Orangi, Baldia and Site, all which are under-developed districts and towns of Sindh Province. The communities of these districts/towns are poor, marginalized, economically and socially vulnerable, as well as backward and deprived of basic necessities. The per capita income of the majority of the households is low therefore it is hard for them to make both ends meet and manage their bread and butter. Hence, almost all members of the family including females go out and work to earn their living. In most cases they just leave their children at home unattended and without any proper care.

As parents need to go out to work for earning money it is also essential that they must have a safe, clean environment where they can leave behind their young children to be looked after with proper care. Out of the total population of the above mentioned districts, only 2.5% people are literate and have an average income of US\$ 40/month which is not sufficient to manage the basic needs required for a family (normal family size 6-8 person) which has 3-4 children as members of the household. Only 10 percent of the children are able to complete primary education due to lack of proper motivation or interest in well being of the children due to absence of proper facilities.

The mission of SALBWS is to provide educational and livelihood opportunities for children, youth, and women of backward communities and enable them to gain new skills to improve their vulnerable lives. Hence, SALBWS designs and implements appropriate programs according to the needs of the people in backward and least developed areas, after identifying the problems. This innovative project is a part of SALBWS development program with the aim of empowering the children and their parents in these communities by creating a safe learning environment for them. This project focuses on underprivileged communities of Sindh, where children of all ages face a high risk of discontinuing their education due to poverty and discrimination between high and low castes and absence of facilities for proper care and education. This project therefore supports all the children in need of better care and educational facilities in these selected district and towns of Sindh.

The project intends to train and educate girls and mothers to become trained care takers at home and in Baby Day Care Centers. It is hoped that the trained girls and mothers trained by SALBWS will be able to start a **Home Day Care** Center independently in their neighborhood with support from the Women Development Department to provide a safe caring and learning environment for children of parents who have to go out to earn their livelihood. The trained females could even become an entrepreneur and start a **Day Care Center** for children in an

away-from-home setting. In any case, the rewards will be great not only financially but personally as well.

The highest priority of SALBWS is to make child care better, safer and more affordable. That is why our balanced budget includes the most significant investment in child care and contributes to improve the education, living conditions, health and the livelihoods of the people of the community.

Rationale of the Training:

In rural areas of Sindh, due to lack of awareness and skills among the mothers and the community, children between the ages of 0 to 5 years are excluded from the mainstream development activities taking place at schools. On the other hand approximately 500,000 children of age 0 to 7 years die every year due to the issues related to lack of health, nutrition, hygiene, safety and awareness. Therefore, it becomes an inevitable fact that baby and child day care skills should be provided to mothers and girls in these communities. Mothers and girls need to be trained in the basic techniques of baby and child care so that they are able to provide basic knowledge to other mothers in their communities. These training activities will be organized, developed and conducted for better development of children and their families of these communities.

Duration

The Project has been divided into two phases – the first phase comprised of the training of 12 Master Trainers that was carried out at Karachi from 27th May to 31st May 2012.

In the second phase, the trained 12 Master Trainers became resource persons and were made responsible to train 15 girls who were selected by the Women Development Department from each district in a 90 day training course in Baby day care Centre running and operation. After getting trained, these 15 females will be able to setup a day care center in their own Districts as well as train the untrained simultaneously.

Broad objective of the training:

To develop the capacity of 150 entrepreneurs in Baby Child Care Center through a 90 day Training, so that they can train other mothers and girls in better taking care of children while their families went out to work and earn a living.

Objectives of the Training:

After this training, the participants will be able to:

1. understand the aims and objectives of the project
2. acquire knowledge and skills of baby and child care and development
3. guide others in establishing a baby and child care center in the community
4. give training to 15 nominees as trainers of the project in their district

Contents of 90 Day Training Being Imparted:

The knowledge and skills provided to the participants (master trainers) during the training program covered the broad and detailed objectives of the project and follows the outline provided in the manual developed by the department of Women Development, Govt of Sindh. The contents being taught by the trained Master Trainers and being covered during the 90 days training are as following:

- Mother care at the start, mid and end of pregnancy
- Mother and child care at the time of delivery
- Child care after delivery upto 40 days
- Basic issues and their solutions faced by mothers during pregnancy
- Review of local rituals & norms for early child care
- Basics of infant care
- Hygiene (hand washing, tooth brushing, diaper changing, toilet use/hygiene)
- Food and nutrition of children ages 0-5 years
- Healthy diet care and charting
- Vaccination importance and schedule

Training methods applied:

The best possible methods of training are being applied by the trained Master Trainers in order to ensure effective and quality learning of the participants. These methods include:-

- Lectures
- Demonstrations
- Individual practice
- Group practice
- Pair practice
- Debate
- Individual assignments
- Multimedia presentations
- Role plays
- Field visit of a day care center
- Chart activities
- Develop day care center environment
- Making teaching aid material

Training of Master Trainers for Training on Baby Child Care

Resource Persons

Training on the above contents was provided for five days to participants by the following resource persons:

S#	Teacher Name	Father / Husband Name		M/F	Qualification	District	Phone/Cell No

Inauguration Ceremony:

The Baby Child Care Training commenced from 1st June 2012 in the approved districts of Sindh. The Ceremony was inaugurated by honorable Minister Tauqeer Fatima Bhutto (Minister of Women Development) as well as respect Madam Hamida Shah Masood Directress of Women Development and Mr. Danish Channa President SALBWS also addressed the participants.

Addressing the inaugural ceremony the Minister of women development stated:

We are carrying ahead the vision of Muhtarma Benazir Bhutto Shaheed. Contemplating her dream and for the development of Women this department has taken aloof. As Mohtarama Benazir Bhutto Shaheed was not only Leader she was also an affectionate mother. As such she wanted to do something for the welfare and training of mothers.

Now today we have brought out the interpretation of her dream in a true, practical world. Now we have arranged and organized the Child Care Training Programme for Women Guidance so that in turn their children can train and guided by the trained mothers.

We have also arranged for the livelihood of women in the sense that when they get fully trained by Day Care Center Training they themselves can be encouraged to setup a Day Care Center in their own local areas and at the same time they will be financially in this regard.

Last one Month Major achievements:

The evident achievements we got out this program are as follows:

- The training work has been started in all scheduled districts.
- The training started on time sharply in accordance with its schedule.
- Te Women Development Department picked up nice educated and motivated Girls and trainers who got their own district to start working.
- All women and especially girls tool keen interest in the working.
- The most momentous element of the training was that these ha been 100% attendance not a single dropout occurred.
- The girls considered the importance of this program especially with respect to their future.
- The women started implementing the training they received from the center in they own houses.
- 150 female have been enrolled in this project and more are eagerly desirous to join the programme.
- The participants were fully motivated to run the project in their street and home
- The participants showed attention during the training thru reaching on time and doing assignments
- Participants reflects the understanding of the training thru making charts & giving presentations
- Participants found the training useful for their own selves and the community
- The participants started their tasks i.e training of trainers' right from the next day of the end of this training.
